D Miinin of Layf

Vot is d miinin and prpes of layf? From simpli observin d layf saykl of animls and plants, vii arayv at d aansr of "tu riprodus". It is vot ool layforms strayv for and for meni it is d laast fin dey du bifoor dey day. Hauevr, dis miinin haz e problm of srkyulr riizenin. Layf srvayvs tu riprodus and it riprodusis, sou dat layf ken kontinyu. Dis is nou betr den seyin dat deer is nou miinin tu layf.

Dat is vay vii luk for e difrnt explneyshn and it brings as tu d aydiya of e hayr pavr, olsou noun as gaads. Deer aar meni relijns in d vrld, iich of dem kleyms tu nou d truf. Hauevr, dey aar exklusiv tu iich odr. Ounli van of dem ken bii tru, bat it is faar moor laykli dat ool of dem aar inkorekt. Vich miins dat aydr deer aar nou gaads, oor deer aar sam and vii dont nou enifin ebaut dem.

Lets asuum deer aar gaads and dey kriyeyted d yunivrs. Dey problbli hed e riizn for it and dat riizn is d miinin of layf vifin d yunivrs. Hauevr, d gaads aar nau in d seym pozishn d layf vif nou gaads voz in. Vot is d miinin of deyr existns? If deer is nan, den votevr prpes dey hed in maynd for layf luuzis its signifikens as vel.

D problm is dat gaads kaant exist simpli tu jast exist. Dat haz d seym srkyulr riizenin problm. And eni odr riizn riqayrs enadr kriyeytr abav dem, vich vud liid tu nevr endin cheyn of gaads and deyr oun hayr gaads, vich is iqali poyntles. D laast posibiliti is dat d riizn for deyr existns is biyond aur komprihenshn.

Anforchnetli, dat das not help as iidr. Evrifin dat exists in aur yunivrs is vifin aur komprihenshn, jast as enifin vii ken imajin is in aur komprihenshn. Sou, d riizn for gaads existns, vich bay ixtenshn givs miinin tu aur layfs, vud hev tu bii komplitli anfinkabl for as. And van kud sey, dat is egen nou betr den nou miinin at ool.

Vii aar not mastrs of aur oun maynd. Vii did not disayd tu layk komedi, myuuzik, oor d teyst of fuud. Vii aar jast meyd dat vey. Derfoor, trayin tu dirayv miinin of aur layf from fings vii layk duin is layk trayin tu dirayv it from d miinin of layf itself, vich is nan. In d end, bay kontinyuin aur layfs, d onli fin vii du is biyin obidiyent tu aur bayolojikl prougramin – avoyd peyn, siik plezhr.

Dis riyalizeyshn mey liid sam piipl tu d dizayr of endin deyr layf. Hauevr, vii biliiv dat piipl dayin, oor iivn d def of ool hyumns, das not solv d ishyu. Deer is en anfademebl emaunt of kriichrs on aur planet dat teer apart and divaur iich odr evri seknd. Dey safr d seym feyt es as, iivn dou dey dont riyalayz it. And givn inaf taym, enadr intelijent spiishiis mey imerj, vich vil aask d seym qeschns vii did. D riil solushn is d distrakshn and privenshn of ool layf.

Vii aar in e yuniik sichuyayshn. Not onli vii aar eybl tu riyalayz hau neychr manipyuleyts as, vii aar teknolojikli divelopd inaf tu fayt bak. Planets, dat suport layf, ken bii meyd sou dey dont. Dis ken bii achiivd bay outomeytid self-replikeytin speys ships dat vil spred intu evri staar sistm, meykin shuur nou layf ken imerj evr egeyn.
